For Quality Cleaning Products®*

## *Zephyr has a yarn and mop configuration for your job including:*

**Narrow Band-** Zephyr narrow band mop heads come standard with a 1<sup>1</sup>/<sub>4</sub>" wide band and 2 rows of stitching.

**Fantail -** a high quality tailband is sewn across the bottom of each mop with 2 rows of stitching. The tailband fans the yarn to give the maximum mopping area and to eliminate tangled messes when mopping and wringing.

**Wide Band -** a heavy duty 5" wide polyester mesh is sewn on with multiple rows of stitching. Use with gripper type mop handles.

**Cotton** – excellent absorbency characteristics and very economical when a disposable mop is needed.

**Rayon** – used for waxing and other applications that require less linting and more absorbency.

**Z-Ray™** – an economical blend of rayon and synthetics.

**Tuf/Blend™** – wears and launders very effectively. For the best combination of durability, strength and absorbency the Tuf/Blend™ is your mop.

**H•C/Blend™** – Specifically designed for health care use. It is built to wash, absorb and last. H•C/Blend™ yarn is infused with an antimicrobial agent that will remain effective after repeated washings.

**BlendUp™** – an economical blend of cotton, rayon and polyester, also good initial absorbency.

**Top-Kote™** – specially blended blue stripe yarn for applying floor finish.

**Nylon** – designed for applying floor finish, this continuous filament nylon yarn is virtually lint free and allows for maximum uniform coverage of finishes.

**Roughup™** – specifically designed for the most demanding surfaces. The Roughup™ will last and effectively clean surfaces that destroy most ordinary yarn types.
