

MICROFIBER WORKS BETTER

It's Better!

While "old-fashioned" cotton cleaning tools simply push around dirt, bacteria and chemicals, microfiber attracts dirt, absorbs chemicals and reduces bacteria.

It's Healthier!

When a bacteria culture is taken after cleaning with a microfiber mop, there can be up to a 99% reduction from precleaning vs. just a 33% reduction when using regular cotton mops.

It's Smart!

- **Reduce mop costs by 60%:** Microfiber mops can be laundered up to 500 times. Compare that to the 50 times of regular mops.
- **Save 90-95% per day in product costs:** Because of microfiber's increased efficiency and efficacy, you can experience water and chemical savings as much as 90-95% per day, according to the EPA's statistics.
- **Lower labor costs by 20% per day:** Using microfiber reduces fatigue while increasing square footage coverage. Employees also make fewer trips to change water/solution.

Microfiber strands are split or "cracked" 10 times which creates a positive electric charge. The dirt and dust particles have a negative charge which makes them a perfect match — one who's bond is super strong. The extremely fine microfibers are so small they can get into surface pores and pull out the smallest of dust particles (microdust). Conventional mops glide over the surface pushing dust into the air and leaving microdust in the surface pores which dulls floor finishes.

This miraculous material is available in several useful cleaning products including: damp mop pads, dry dust mop pads, and dust/polishing cloths. Choose from several accessories including our aluminum mop frames available in 18" and 24" sizes. The Flexible Dry Duster Tool is also available with an optional telescoping handle.

Microfiber Flat Damp Mop System

The flat damp mop pad grabs and holds dirt and grime. The spaces in the pad allow for large amounts of moisture to be collected making the pad very absorbent. Available in 18" and 24" lengths and are packed 12 per case. Use clip-on flat mop frame or aluminum snap-on frame.

Scrubbing Pads

Interwoven lines of scrubbing strips get up tough dirt and clean grout lines. Available in 18" and 24" lengths and are packed 12 per case. Use clip-on flat mop frame or aluminum snap-on frame.

Microfiber Cloths

Zephyr's microfiber cleaning cloths are color coded to aid you in your specific job needs. All cloths are 16" x 16" and come packed 12 per case.

Microfiber Loop Mops

The performance of microfiber in a loop mop!

Yarn made of technologically advanced, continuous filament microfiber offers the ultimate in absorbency and significantly faster drying times. Looped construction along with a standard 5" mesh headband promotes optimum, lint-free cleaning. This durable material launders exceptionally well. Available in Small, Medium, and Large sizes to fit your needs.

Microfiber Cloth Looped End Mop Heads

The ultimate mop head for demanding jobs. Knit microfiber tubes bring the cleaning power and durability of microfiber cloth to a looped end mop head. To top it off, this mop has a 5" wide mesh headband. Available in Medium and Large sizes.

Microfiber Dry Duster Tools

Metal and foam flexible construction bends to fit any surface. Fits small threaded handle or our telescoping handle (up to 70") for hard-to-reach areas. Reusable microfiber dust sleeve can be washed hundreds of times.

NEW!

Easy Flo™ Bucketless Mop

The new Easy Flo™ Bucketless Mop is the perfect companion to our microfiber damp mop heads. Spray chemicals directly on the floor with the simple squeeze of the ergonomic palm trigger.

- Can cover up to 3,000 square feet
- 28 oz capacity bottle
- Optional HDPE refill bottle available
- Easy connect and disconnect refill bottle makes changing chemicals even easier

Aluminum Mop Holders

The unique shape gets into corners and hard-to-reach areas. Strong reinforced aluminum construction for all types of microfiber flat mops. Available in 18" and 24" lengths.
